

Sexual Orientation

Diversity Alliance Website

Kira Capper was a Girl Scout for 13 years as a member of Troop 869 in Service Unit 634. She is a Girl Scout Alumna and currently a freshman at Drake University.

Kira's Gold Award project addressed the need for better leadership within a student organization at her high school, Shawnee Mission West. Her project aimed at bettering relationships among various cultural and social groups in the student community. The Sexual Orientation Diversity Alliance (SODA) club at her school lacked organization, a clear message and ability to do the positive work it wanted to achieve. By establishing a website with a calendar of events and creating resources, Kira's project helps to provide awareness and create connections between students from different backgrounds. With a website, the club is more accessible to students seeking information they are looking for.

By improving an already existing organization, Kira could put her resources to work better than trying to build something from scratch. The global implications of this project are an improved ability for students of all backgrounds to appreciate, understand and connect with one another now and in the future.
