

## Train Depot

Skylar Clark has been a Girl Scout for seven years and is a member of Troop 8184 in Service Unit 801. She is currently a junior at Maur Hill-Mount Academy.

Skylar's gold Award encourages children to learn more about the history of their town. Skylar found that a historical point in Atchison, the train depot did not look appealing anymore. Skylar's project focused on revitalizing the Train Depot by painting some of the wagons and planting a new garden. After the completion of her work, Skylar held an event for local children to learn more about the trains. By creating this event to show how cool the town's history is, Skylar inspires children to spread the information to others.

Skylar worked with the Northeast Kansas Railroad Association and the Chamber of Commerce who have agreed to maintain the garden and other contributions. With the new and approved appearance of the Train Depot, more children are encouraged to visit and learn more about local history and the impact it has.

**Because of Girl Scouts...** I have grown in my leadership skills, have learned to improve my community interest, and performed many volunteer activities.

Skylar Clark

Atchison, Kansas
