

Make Your Own

Unicorn Kinetic Sand

Prep Time: 5–10 minutes

INGREDIENTS

- 1 C fine white sand
- 1 Tbsp corn starch
- 1 Tbsp fine glitter (use multi colors or just gold or silver)
- 1 Tbsp water
- 1 tsp dish soap
- 1/4 tsp food coloring

INSTRUCTIONS

1. In a bowl, mix sand, corn starch, and glitter.
2. In a separate bowl, combine water, dish soap, and food coloring gently (so as not to activate bubbles in dish soap).
3. Pour wet mixture into dry mixture and stir or knead to combine. If mixture is too dry, add water 1 tsp at a time until it feels like beach sand and is moldable.
4. Store in an airtight container.

NOTES

1. Add your favorite essential oil to wet mixture before combining wet and dry mixture if you want to add scent. Or, use an anti-microbial or anti-bacterial essential oil for longer lasting kinetic sand.
2. Repeat process to make more colors!
