## Care Kits for Foster Kids

Danielle Kasper has been a girl member for 14 years in Troop 157 in Service Unit 678. Danielle attended Johnson County Community College for her freshman year, and will transfer to the University of Kansas to pursue her degree in Psychology.

Danielle's project procured critical supplies for children in need, while bringing awareness, and education about the foster system in Kansas to her community. She hosted a donation drive to collect, package and distribute hygiene supplies and other comfort items to foster children in need. By gathering supplies for children who often cannot advocate for themselves, Danielle is making a difference in her community.

Hygiene supplies and similar items can mean everything to children who have nothing, especially during transitional times. Through her advocacy and education, Danielle hopes to improve the lives of children and create a more aware public that advocates for foster care children.

**“Because of Girl Scouts, I feel confident to travel and meet new people.”**
